

Arthritis and Rheumatology
South Bay

Y.S. Lynda Lee, MD

Rheumatology / Immunology

Y.S. Lynda Lee, MD, likes the work of “a medical detective”, to get to the root of her patients’ medical problems by listening carefully and setting aside any biases. She wants patients to follow a healthy lifestyle in conjunction with medical management.

Dr. Lee enjoys working with young adults as they come onto their own and partners with the pediatric rheumatology department at Lucile Packard Children’s Hospital to transition their pediatric patients into the adult care as smoothly as possible.

Dr. Lee has special training in osteoporosis and has studied and worked in the division of endocrinology and metabolism. She also has a special interest in scleroderma, lupus, rheumatoid arthritis, and vasculitis.

- Stanford Medicine, Fellowship

About Arthritis and Rheumatology South Bay:

Our Board Certified Rheumatologists provide consultative services for the diagnoses and treatment of patients with complex autoimmune disorders, osteoarthritis, osteoporosis and soft tissue conditions. We offer X-rays, lab, MRI and infusion services under one roof.

Our excellent, caring doctors, provide comprehensive care with compassion and integrity, and we put patients above all. We are true patient advocates. We like to educate and empower our patients so we can be partners in their care. We believe it is important for our patients to understand that rheumatological problems are treatable and that patients can continue to have great quality of life.
