

Dear Colleagues,

The **Stanford Online Second Opinion Offering** has launched! This initiative will allow our physicians to deliver remote record reviews so patients across the globe can make more informed decisions about their care.

Stanford Medicine has partnered with Grand Rounds to enable *two* second opinion offerings:

- 1) Stanford Health Care and Stanford Children's Health have jointly launched a Stanford branded offering, through which patients from across the globe can initiate an online second opinion request from a Stanford physician. Patients pay out-of-pocket for this service. This offering has launched in *select specialty areas* where Stanford Medicine has traditionally received the highest demand:
 - [Adult Second Opinion Offering](#): Neurology, Neurosurgery, Cardiovascular Services, Orthopedic Surgery, and Oncology
 - [Pediatric Second Opinion Offering](#): Neurology, Neurosurgery, Cardiovascular Services, Orthopedic Surgery, and ENT

- 2) Stanford specialists, from *all specialties*, will be able to provide second opinions for more than 120 employer customers and 4.2 million members that receive access to this second opinion service as an employee benefit through Grand Rounds.

If you have additional questions, please contact the Stanford Health Care Digital Health Care Integration team at DigitalHealth@stanfordhealthcare.org or the Stanford Children's Health Digital Health Services team at DigitalHealth@stanfordchildrens.org.
