INFLAMMATORY BOWEL DISEASE: Advances in Research and Practice
March 13, 2020 • 7:30 am – 5:10 pm • Paul Brest Hall, Munger Building • Stanford, CA
CME INFORMATION

STATEMENT OF NEED
The Stanford IBD Symposium will be a dynamic forum supporting interactive learning across disciplines. The expert, multi-disciplinary faculty will present data and facilitate active discussions on a diverse variety of topics including the microbiome and diet, the importance of incorporating patient-centered care, best clinical practices using recently-approved therapies, and innovations in endoscopic and surgical approaches. Case-based discussions and networking will be integrated into this thought-provoking and stimulating educational meeting.

TARGET AUDIENCE
This is a national program designed for physicians, nurses, pharmacists, nurse practitioners, and physician assistants, allied health professionals, interns, residents, fellows and community partners specializing in Gastroenterology and Hepatology, Family Practice, Internal Medicine, Primary Care, General and Colorectal Surgery and Basic scientists.

LEARNING OBJECTIVES
• Discuss the clinical management of Crohn’s Disease and Ulcerative Colitis
• Identify the latest therapies to treat IBD and their potential side effects
• Review preventative health for people with IBD
• Optimize the care of IBD patients using the latest endoscopic and surgical management techniques

FACULTY
All faculty members are from Stanford University School of Medicine unless otherwise noted.
